Aarush Karak

worldshaans@gmail.com · Greater Toronto Area, Canada · www.linkedin.com/in/aarush-karak-260257321

Summary

A Grade 10 student passionate about computer science, software development, AI systems, and spatial computing, seeking opportunities in AI, software engineering, spatial computing, STEM education, and youth-led technology projects. I build hands-on technical projects using Python, JavaScript, HTML/CSS, Java, C++, Three.js, MediaPipe, REST APIs, and data/ML tools. I bring a strong background in developing innovative software solutions and a keen interest in leveraging technology for practical problem-solving.

Professional Experience

Back End Developer
June 2026 – Present
CommunityOne — *United States*

- Engineered robust, cloud-native backend systems to bridge the information gap between municipal bureaucracy and local residents.
- Designed to centralize fragmented public records and legislative datasets.

Web Developer
June 2026 – Present
Chingu — *Toronto, ON*

- Acted as a core developer to build out robust application features, participating in weekly sprint planning, asynchronous stand-ups, and peer-reviewed Git workflows.
- Focused on creating scalable data architectures, utilizing Python for automated backend data processing pipelines, PostgreSQL for relational database management, and React/Node.js to deliver a responsive, user-facing interface.

Application Developer
June 2025 – Present
Hack Club — *United States*

- Optimized backend synchronization to provide seamless, low-latency data updates across concurrent client sessions.

Web Developer
April 2025 – Present
Fiverr — *United States*

- Delivered over $5,000 in high-value client projects.
- Bridged the gap between complex engineering and minimalist, intuitive user experiences.

Co-Founder & CEO
July 2023 – Present
The Coder Bros — *United States*

- Build and showcase software projects focused on AI, web development, spatial computing, and practical problem-solving.
- Explore project-based learning, technical writing, and peer-facing coding content.

Parliamentarian
August 2025 – May 2026
Technology Student Association — *Coppell, TX*

- Helped guide and lead 200+ students to the TSA State Conference 2026 with 30+ state finalists.

Intern
June 2025 – September 2025
Sci-Tech Discovery Center — *Frisco, TX*

- Educated museum guests, helped operate makerspace activities, and supported hands-on STEM learning experiences.
- Selected through a competitive phone, solo, and group interview process, recognized as the youngest student accepted into the program.
- Built communication, responsibility, and independent work skills while collaborating with adult staff.

Member
May 2024 – May 2025
National Junior Honors Society — *United States*

- Developed strong communication and teamwork skills through fundraising experience, valuable for creating inspiring and educational experiences.

Education

John Fraser Secondary School — Greater Toronto Area, Canada
High School — *2029*

Coppell High School — Coppell, TX
High School — *2026*

Russian School of Mathematics — United States
Mathematics — *2029*

Garden High School - India — India
High School — *2018*

Skills

- Chatbot Design
- Chatbot Development
- Arduino IDE
- Python
- JavaScript
- HTML/CSS
- Java
- C++
- Three.js
- MediaPipe
- REST APIs
- Data Analysis
- Machine Learning
- UI/UX Design
- Full-stack Development
- Agile Methodologies
- PostgreSQL
- React
- Node.js
- Git / GitHub
- AI Systems
- Spatial Computing

Languages

- English, Native or bilingual proficiency
- Hindi, Native or bilingual proficiency
- Spanish, Limited working proficiency
- Bengali, Native or bilingual proficiency
- Marathi, Limited working proficiency

Certificates

- AI Fluency Framework & Foundations | Anthropic Inferred | Issued 2026
- Claude Code in Action | Anthropic Inferred | Issued 2026
- Advanced SQL | Kaggle inferred| Issued 2026
- Intro to Machine Learning | Kaggle inferred | Issued 2026
- Career Essentials in GitHub Professional Certificate | GitHub/LinkedIn Learning inferred | Issued 2026
- Artificial Intelligence Fundamentals | IBM inferred | Issued 2026

Projects

HELIOS | *2024-2025*
- A browser-based AI operating system with hand-gesture navigation and a 3D spatial interface.

Finance Hub | *2024-2025*
- A full-stack financial intelligence platform with live market monitoring and AI-driven prediction exploration.

Knowledge-Globe | *2024-2025*
- An interactive 3D encyclopedia.

FixMate | *2024-2025*
- An AI-powered home maintenance app.
